

PVC

MATERIAL TECHNICAL DATA SHEET

Description

Tin stabilised, rigid vinyl compound suitable for general-purpose extrusion of profiles. It has been formulated to exhibit a glossy finish and medium to high impact strength when extruded under suitable conditions.

Application

Can also be used in outdoor applications, however performance is dependent upon the colour, processing conditions and the exposure conditions.

Safety

Material Safety Data Sheets are available.

Physical Properties (Typical)

Property	Test Method	Value	Units
Specific Gravity	ASTM D792-1986-Method A	1.36	-
Break Tensile Strength	ASTM D638M-1991	32.0	MPa
Yield Tensile Strength	ASTM D638M-1991	45.0	MPa
Elongation at Break	ASTM D638M-1991	71.0	%

Typical properties not to be construed as specifications. Batch Certificates are available upon request.
